TypeSdk 打包工具手动安装部署:TypeSdkManage 和 TypeSdkPackge 两个模块统称为打包工具以下范例服务器操作系统使用: windows\_server\_2012R2

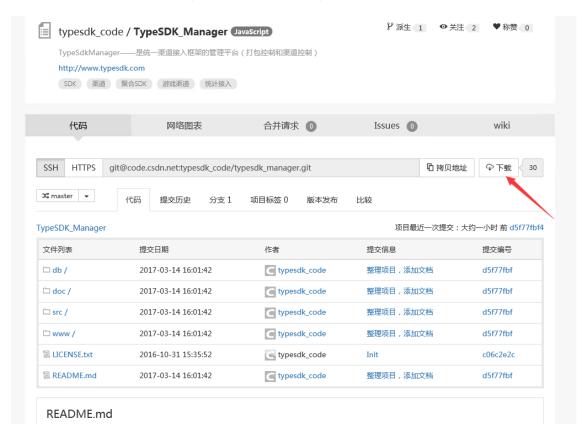

软件使用: Mssql\_express\_2012; Jdk1.8; Nodejs6.9; Android-Sdk-Windows27; Ant1.9 代码和相关环境可以在这里下载

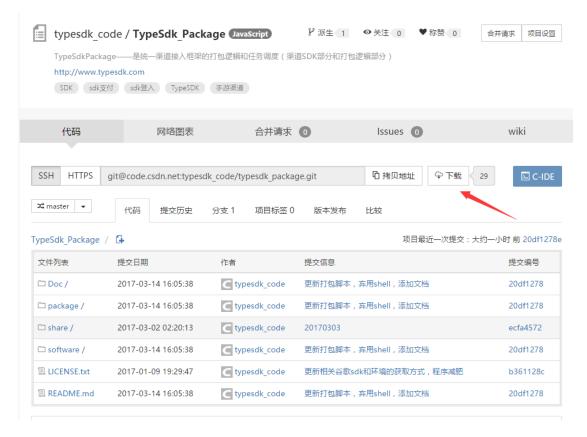

TypeSdkManage: <a href="https://code.csdn.net/typesdk">https://code.csdn.net/typesdk</a> code/typesdk manager/tree/master

TypeSdkPackge: https://code.csdn.net/typesdk\_code/typesdk\_package/tree/master

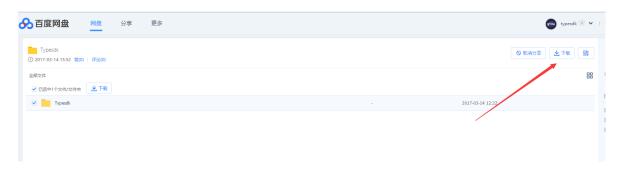

相关环境包: http://pan.baidu.com/s/1hrCrgEw

- 一、安装完 windows 之后, 先下载相关程序
  - 1、到网站上下载 TypeSdkManager 和 TypeSdkPackge 的源码

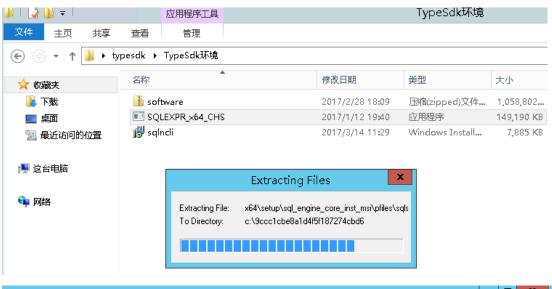

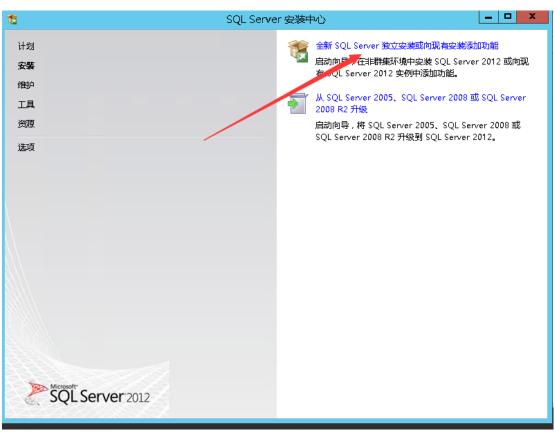

2、从百度云上下载相关环境

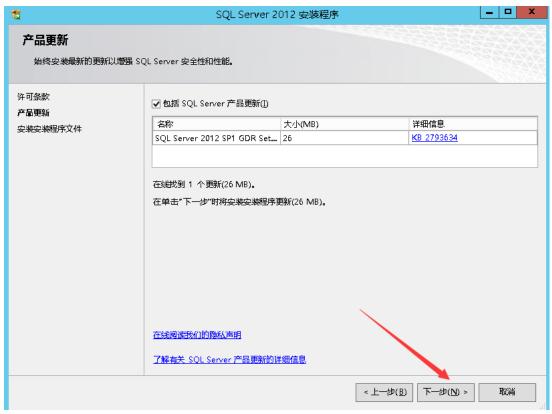

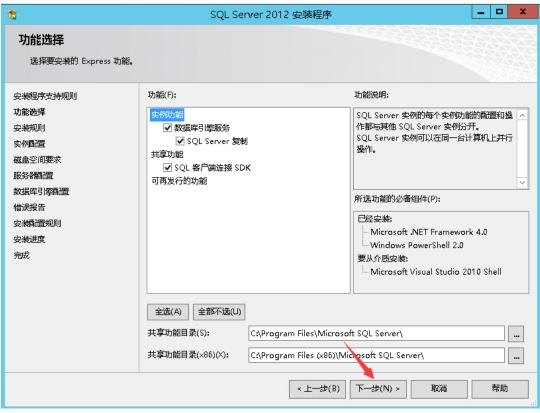

- 二、安装 Mssql 并导入数据库
  - 1、安装 mssql

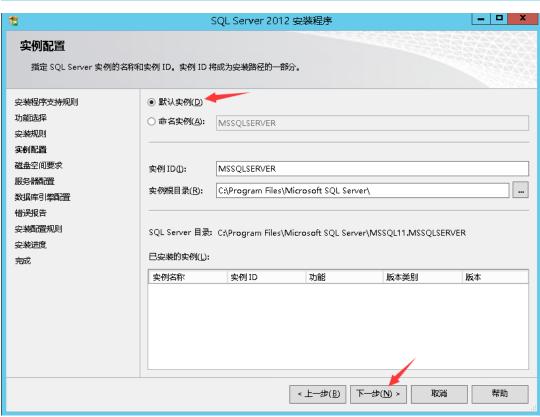

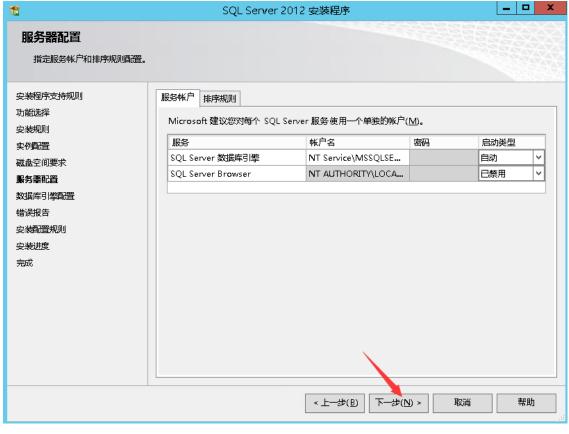

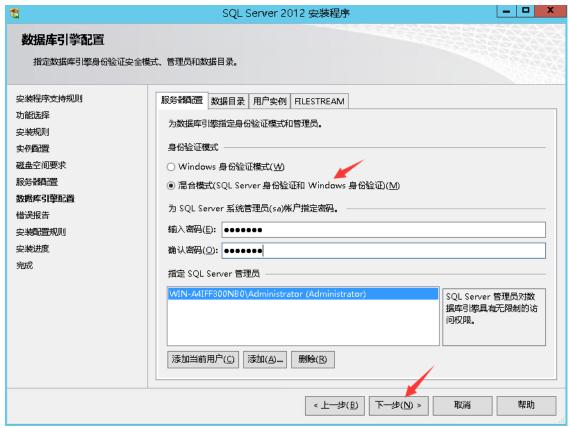

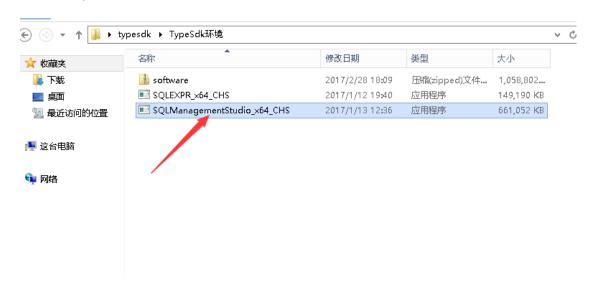

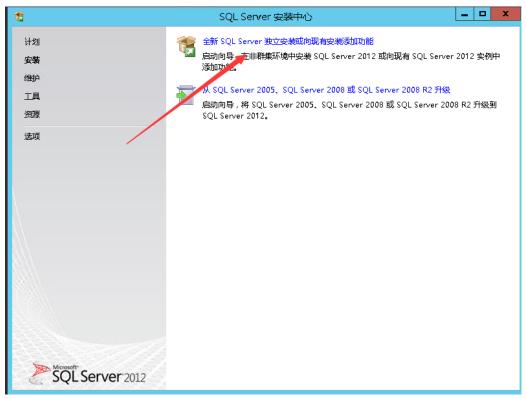

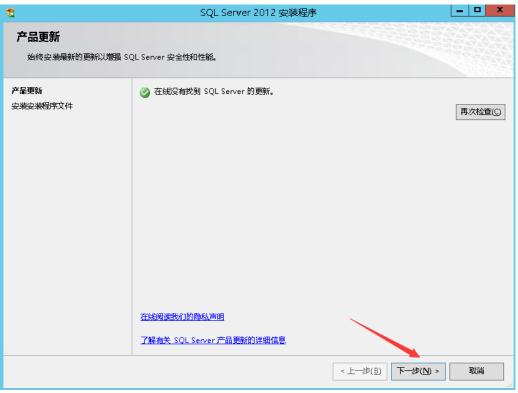

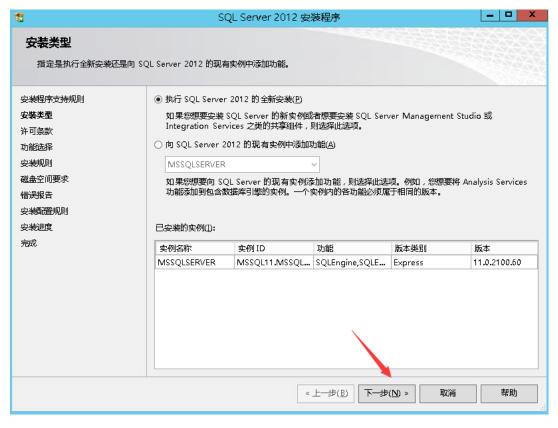

# 2、安装 mssql 管理工具

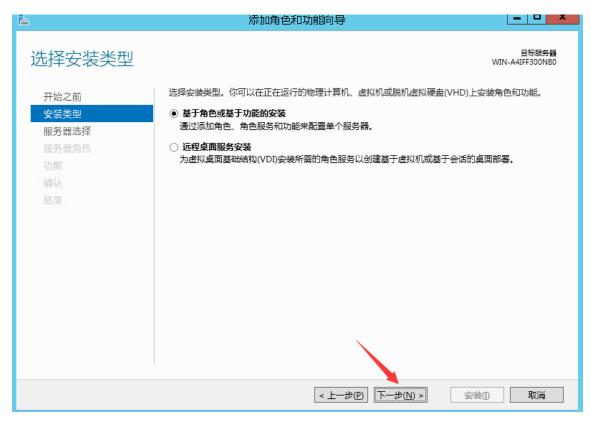

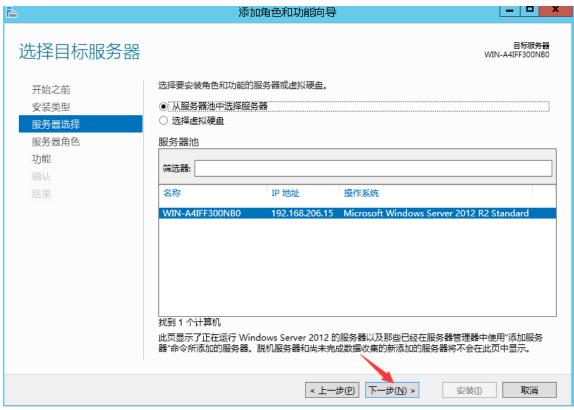

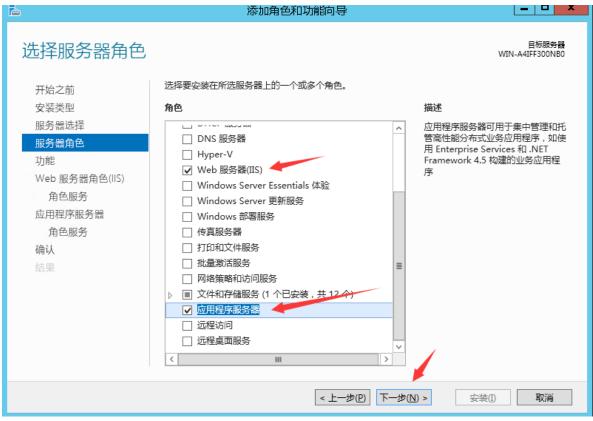

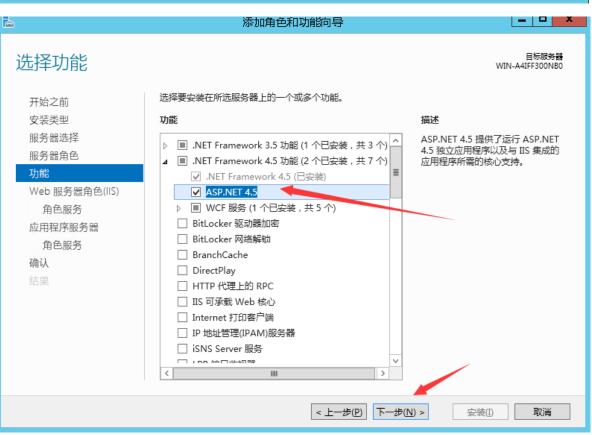

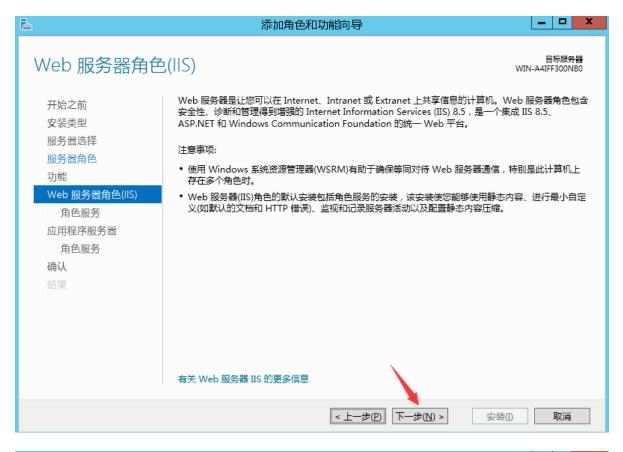

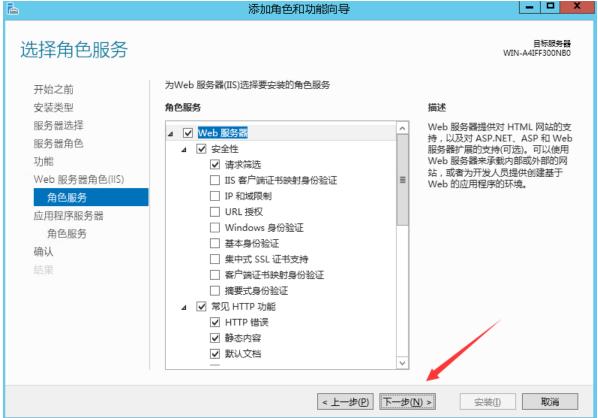

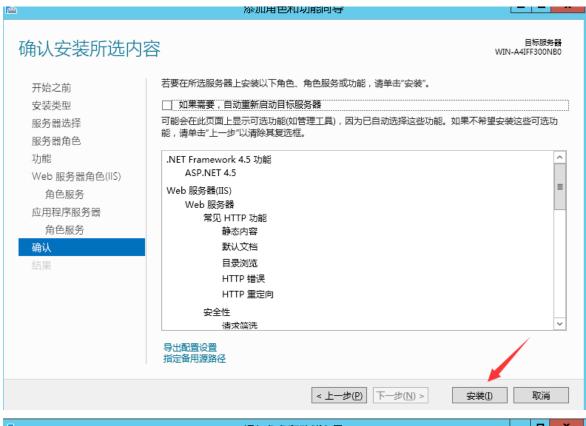

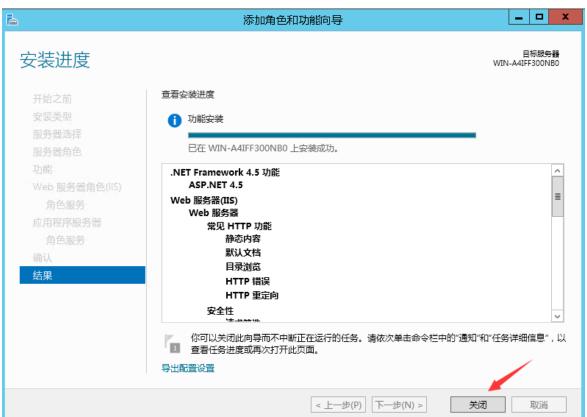

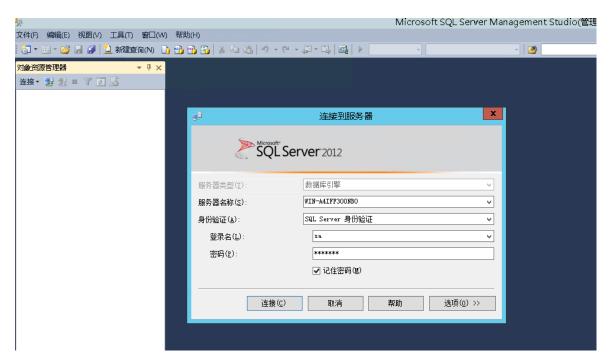

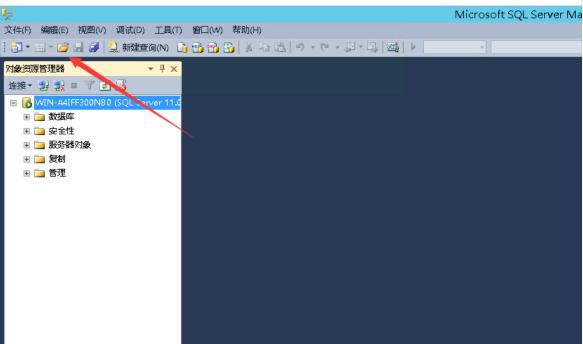

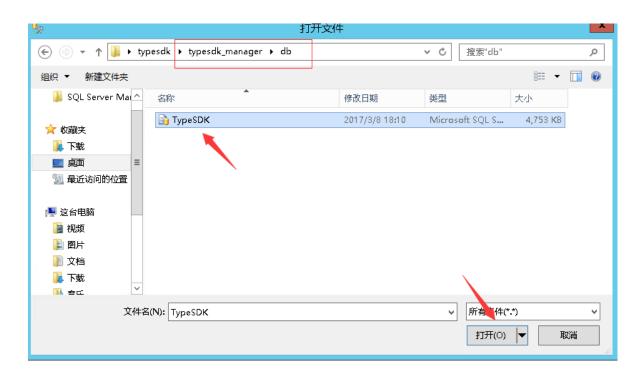

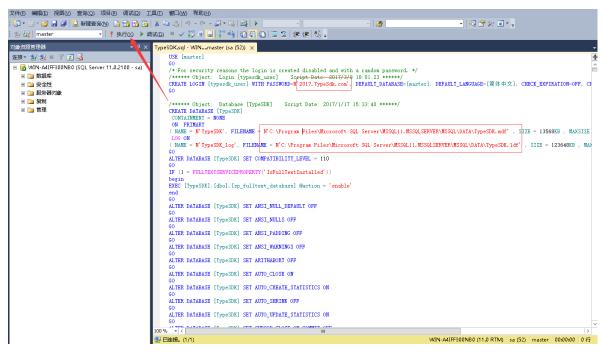

#### 四、配置数据库

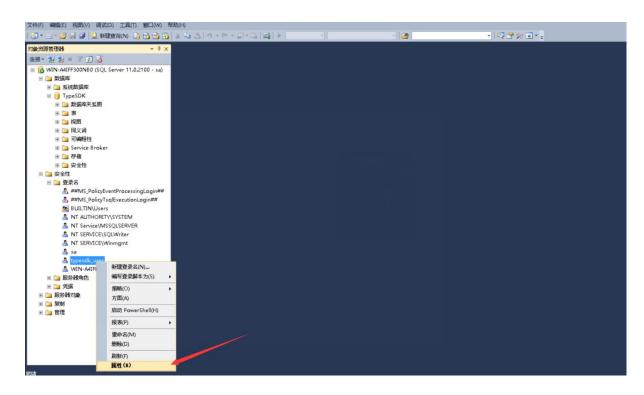

1、导入数据库

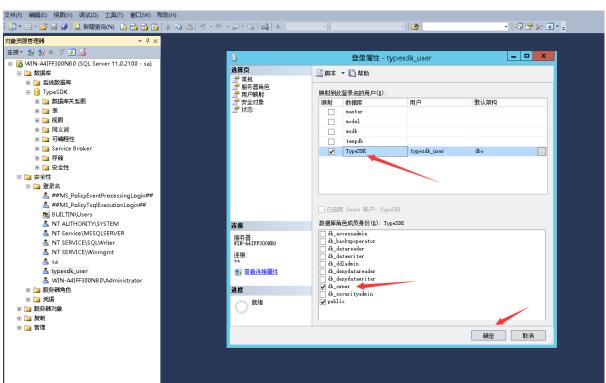

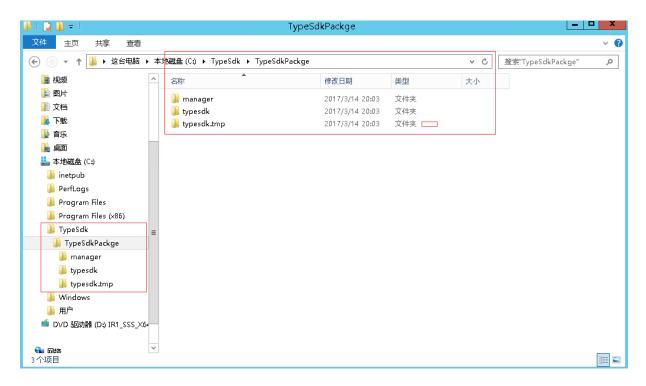

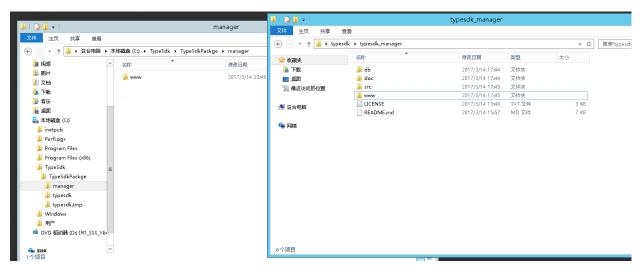

#### 五、部署打包工具

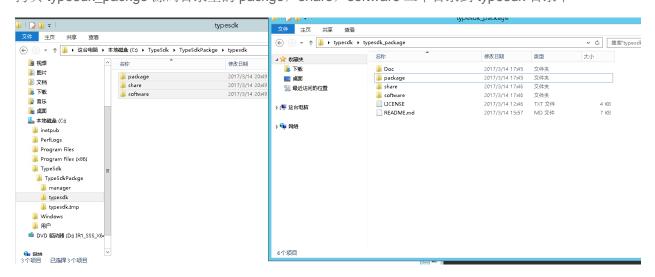

1、新建目录结构

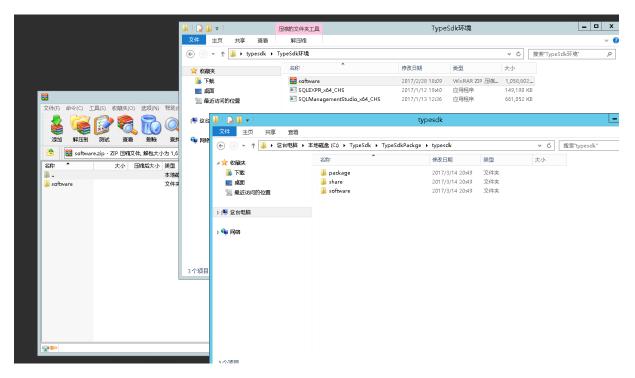

拷贝 typesdk\_manager 源码目录里的 www 目录到 manager 目录下

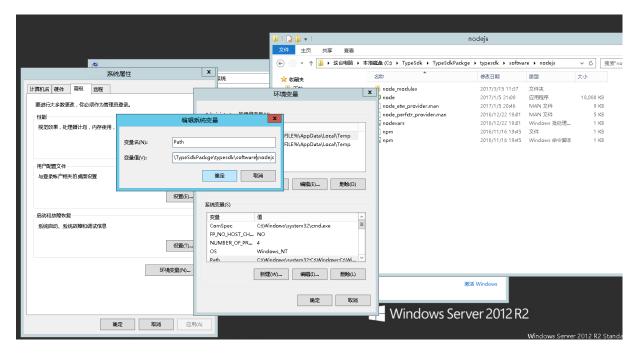

拷贝 typesdk\_packge 源码目录里的 packge, share, software 三个目录到 typesdk 目录下

解压百度云下载的 software.zip 到 typesdk 目录(请使用 winrar 解压,windows 自带的 ZIP 解压会因为文件名过长报错)

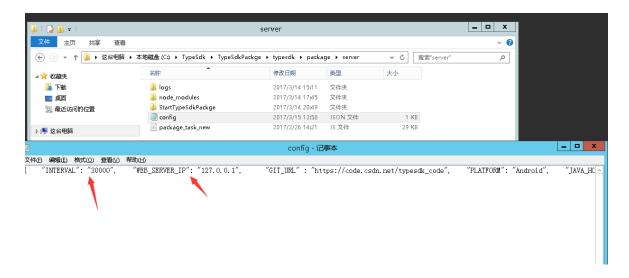

添加 nodejs 环境变量

# 2、配置 TypeSdkPackge

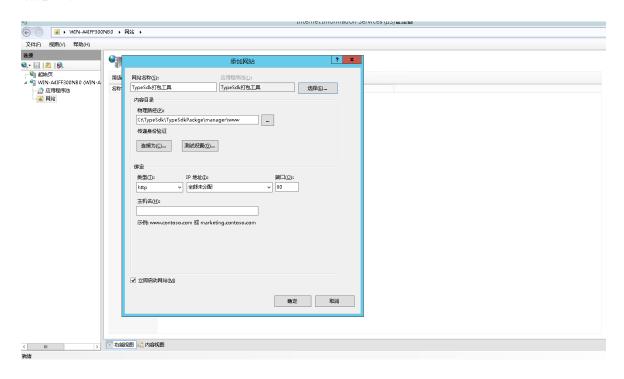

打开 C:\TypeSdk\TypeSdkPackge\typesdk\package\server 目录下的 config.json 配置文件,修改配置 INTERVAL:接受任务的查询时间,建议使用默认

WEB\_SERVER\_IP: TypeSdkManager 的 webserver 访问地址

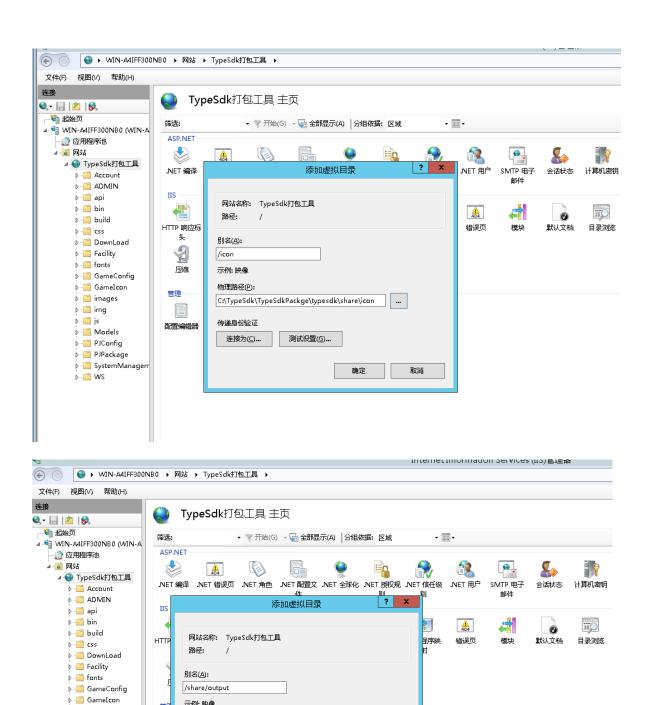

#### 六、配置 IIS

1、新建网站

#### 2、添加虚拟目录

/icon 映射 C:\TypeSdk\TypeSdk\Packge\typesdk\share\icon /share/output 映射 C:\TypeSdk\TypeSdk\Packge\typesdk\share\output

# 3、修改 web.config 配置文件

▶ - III Models ▶ - ☐ PJConfig

▶ - ☐ PJPackage

▶ - ☐ SystemManagem Þ-<u>III</u> WS . ▶ 🚮 icon

⊳ - img

建库脚本会新建 typesdk 数据库, typesdk\_user 用户和密码,用户一般不需要改动

C:\TypeSdk\TypeSdkPackge\typesdk\share\output ...

测试设置(G)...

确定

取消

示例:映像

物理路径(P):

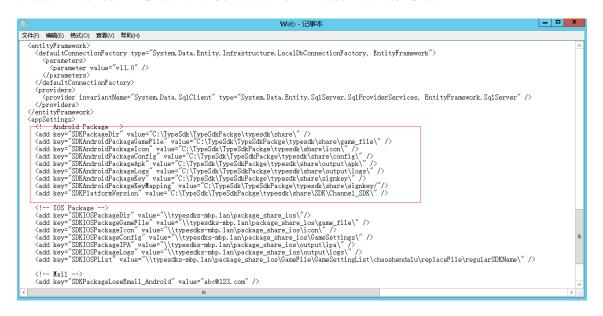

传递身份验证

连接为(C)...

管

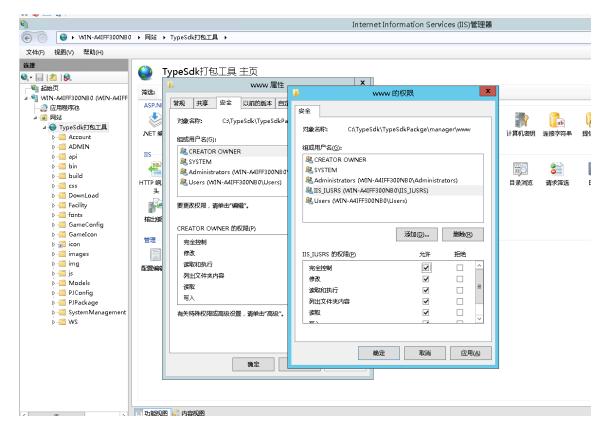

置酒

根据自己的文件位置修改,如果使用前面文档中的路径则不需要修改

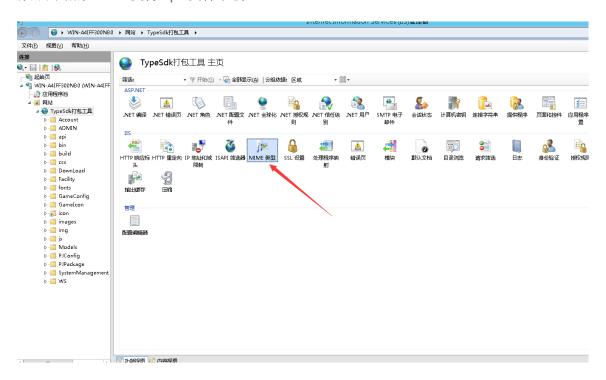

#### 4、修改 www 目录权限

目录添加 IIS\_IUSRS 用户,并给与完全控制权限

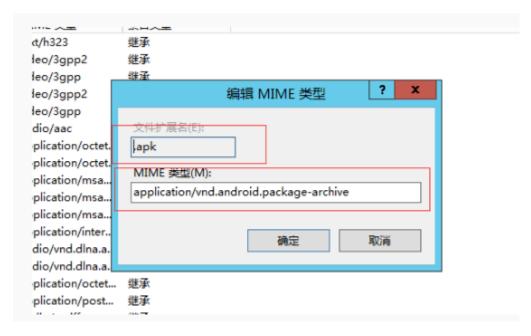

5、添加网站的 MIME 支持 apk 文件下载

扩展名: .apk(前面的.别漏了)

MIME 类型: application/vnd.android.package-archive

# 七、访问打包工具

http://IP

默认用户: demo@typesdk.com

默认密码: 123.com

# 如果想了解更多,请关注我们的 blog 和官网
